Our next Prime Cattle Sale will be on Thursday 28th of July at 07.30am

Sheep guts used to be made into string for tennis rackets. These days, cows are the preferred source of gut for stringing, in part because sheep guts are so valuable for sausage making

As well as being a natural waterproofing agent, the lanolin in wool has antibacterial and antifungal properties that make it valuable in the cosmetic and pharmaceutical industries.

The world is rediscovering the benefits of wool: it's insulating, fire and wrinkle resistant and durable. Wool fibres can absorb up to 30% of their own weight in moisture, making fine woollen garments uniquely able to handle body moisture in both hot and cold environments.

Typical Australian wool bales weigh 178 kilograms and around 1.5 million bales are produced each year. (March 2021). Sheep wool will grow forever.
