

Swan Hill Regional Livestock Exchange

Prime Cattle Sale 28th of July 2022

Total Yarding of **630** head

With the fast paced fall of industry prices seen of late Swan Hill Agents managed to draw an additional domestic processor with the largest yarding seen at SHRLE in recent times. Cheaper trends were seen across grown categories, with well finished calves remaining firm. Secondary Cattle were the most heavily discounted while better Cows remained firm.

Cattle Class	Price Range c/kg lw	Top Producers

Our next Sheep & Lamb Sale will be 11th of August, 2022 commencing at 12.30pm

Did you know...

A cow has 32 teeth. A cow will chew about 50 times in a minute, making their jaws move about 40,000 times a day.

The main stomach of a cow, the rumen, holds up to 190lts of food that has been partially digested. Referred to as cud, a cow will chew for up to eight hours a day.

Australia, also known for its cattle industry of around 28 million, only ranks number 7 in the world with the most cattle. But interestingly, the country exports approximately 60% of its cattle, making it the world's 2nd largest beef exporter after Brazil, which is also due to its relatively small population with only less than 26 million Australians as of 2021. In other words, there are more cattle than Aussies in the country.

Cows are very social and don't like to be alone. For example, when a cow isolates itself it's usually because it is sick or about to give birth.
