Did You Know?

Wool proteins are used to create wound dressings, bone graft implants, and medical sutures with the aid of nanotechnology.

Wool is anti-microbial and fire and wrinkle-resistant. It is also biodegradable.

Wool garments last longer than those made from cotton or silk. Wool breaks after 20,000 bends, while cotton breaks after just 3,000 bends.

Lamb is naturally rich in protein, which helps muscle growth and supports muscle mass. It naturally contains **seven vitamins and minerals** that support good health and wellbeing. Lamb provides four essential vitamins that help **reduce tiredness** and fatigue.

Lamb is a source of four essential vitamins and minerals that help the **immune system** to work normally.
